J R G Environmental, Social and Economic Statement

Environmental

At J R G, we are committed to sustainability by reducing, reusing, and recycling wherever possible. We strive to prevent pollution and protect the environment, ensuring that our operations minimize any negative impact. Our sites are regularly instructed to reduce the consumption of natural resources, and we make continuous efforts to maintain a modern, efficient fleet of equipment to reduce emissions as much as possible.

In addition, J R G actively contributes to wildlife conservation through our sister organizations, which include Pezulu Sanctuary, Reata Sanctuary, and Jabulani Safaris.

Social

J R G is committed to working exclusively with reputable companies that adhere to ethical business practices, ensuring we avoid any association with illegal or unsafe activities. We uphold a strict stance against discrimination of any kind and do not tolerate child labour, forced labour, or human trafficking.

We actively contribute to the community through numerous social responsibility initiatives. Our projects span various scales and sectors, including but not limited to the expansion of Mater Dei Hospital, the construction of Gungwe Weir, and the building of Nyabu Bridge. We fully comply with the NEC Construction collective bargaining agreement and maintain workers' committees on all our sites. Additionally, J R G adheres to an approved code of conduct and follows comprehensive SHE (Safety, Health, and Environment) policies, along with strict plant management systems and specifications.

Economic

J R G has long-standing partnerships with several strategic and like-minded companies which include Driptec, Tyrezim, HAC, Machinery Exchange, Chematek, and Plant Technical Services, among others. We also actively support and partner with smaller businesses, helping them grow and improve.

Wherever possible, J R G prioritizes and partners with local and indigenous small and medium enterprises, contributing to economic development. Recent collaborations include partnerships with wholly indigenous companies such as Pavit, Waterbird, Nheyo, ATCE, and RAM Mining, who we have subcontracted on recent projects.
